SUPPLEMENTARY INFORMATION:

A. Purpose

OMB clearance 9000-0134 supports the information collection requirement contained in 52.223-9, Estimate of Percentage of Recovered Material Content for EPA-designated Items. Section 6002 of the Resource Conservation and Recovery Act (RCRA), Public L. 94-580, (42 U.S.C. 6962), requires Federal agencies to develop affirmative procurement programs to ensure that items composed of recovered materials will be purchased to the maximum extent practicable. An agency's affirmative procurement program must include: (1) a recovered materials preference program and an agency promotion program for the preference program; (2) a program for requiring estimates of the total percentage of recovered materials used in the performance of a contract, certification of minimum recovered material content used, and where appropriate and reasonable, verification procedures for estimates and certifications;

and (3) annual review and monitoring of the effectiveness of an agency's affirmative procurement program.

For items the Environmental Protection Agency (EPA) has designated as produced or that can be produced from recovered material, agencies are required to track the percentage of recovered material content used during contract performance. This requirement applies whenever an acquisition sets forth minimum percentages of recovered materials; when the price of the item exceeds \$10,000; or when the aggregate amount paid for the item or functionally equivalent items in the preceding fiscal year was \$10,000 or more.

Pursuant to FAR clause 52.223-9, when the contract requires the delivery of or use of an EPA-designated item, contractors shall report the estimated percentage of total recovered material content delivered or used, at contract completion. The clause is included in solicitations and contracts exceeding \$150,000, except for acquisitions of commercially-available, off-the-shelf (COTS) items.
